

Global Aviation Cyber Security Market 2016 Analysis and Forecast to 2020

Aviation Cyber Security Market to Grow at a 9.24% CAGR Forecast to 2020

PUNE, INDIA, July 20, 2016 /EINPresswire.com/ --

About the [Aviation Cyber Security](#) Market

The introduction of new technologies without robust cyber security measures presents a risk to the aviation industry. The risk is due to the cyber threats that are likely to increase during the forecast period. The aviation industry stakeholders such as cargo firms, airports, and airlines must recognize the risks to their networks and control systems from cyber threats.

Furthermore, they have to take steps to close the gaps and resolve potential vulnerabilities to maintain public confidence in the aviation system. The global aviation system includes varied organizational structures and operating models, distributed networks, interdependent physical and cyberspace functions and systems, and governance constructs that involve multi-level authorities, responsibilities, and regulations.

Research analysts forecast the global aviation cyber security market to grow at a CAGR of 9.24% during the period 2016-2020.

Covered in this report

The report covers the present scenario and the growth prospects of the global aviation cyber security market for 2016-2020. To calculate the market size, we considered revenues generated from the sale of cyber security solutions to the aviation sector. The cyber security solutions include stand-alone and integrated software suites and integrated services by managed security providers.

The market is divided into the following segments based on geography:

- Americas
- APAC
- Europe
- MEA

Technavio's report, Global Aviation Cyber Security Market 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- BAE Systems
- Cisco Systems
- IBM
- Northrop Grumman
- Raytheon

Other prominent vendors

- Airbus
- Boeing
- Booz Allen Hamilton
- CSC
- Fortinet
- General Dynamics
- Thales

Market driver

- Growing number of DDoS attacks
- For a full, detailed list, view our report

Market challenge

- Issues with compatibility
- For a full, detailed list, view our report

Market trend

- Emergence of integrated security solutions
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2020 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?

- What are the strengths and weaknesses of the key vendors?

TABLE OF CONTENT

PART 01: Executive summary

- Key findings

PART 02: Scope of the report

PART 03: Market research methodology

- Research methodology
- Economic indicators

PART 04: Introduction

- Key market highlights

PART 05: Industry overview

- Industry overview

PART 06: Role of cyber security in aviation sector

PART 07: Cyber threats in aviation sector

- Phishing attack in aviation industry
- Potential risks of technological innovations in aviation sector

PART 08: Recent developments in aviation sector

- Internet of Things (IoT)
- Adoption of next generation cloud-based solutions
- Use of biometrics for cyber security in airports

PART 09: Market size and forecast

- Market size and forecast of global aviation cyber security market

PART 10: Market segmentation by application

- Global aviation cyber security market by application

PART 11: Geographical segmentation

- Aviation cyber security market by geography
- Geographical segmentation of aviation cyber security market
- Key leading countries in aviation cyber security market

PART 12: Market drivers

- Increasing number of air passengers
- Rising demand for cloud-based security solutions
- Growing number of DDoS attacks

PART 13: Impact of drivers

PART 14: Market challenges

- Issues with compatibility
- Lack of efficient security solutions

PART 15: Impact of drivers and challenges

PART 16: Market trends

- Emergence of integrated security solutions

- Growing partnerships between cyber security vendors in aviation sector

PART 17: Impact of trends

- Impact of trends in aviation cyber security market

PART 18: Five forces analysis

PART 19: Vendor landscape

- Top-vendor offerings

- Vendor matrix

PART 20: Competitive landscape

PART 21: Key vendor profiles

- BAE Systems

- Cisco Systems

- IBM

- Northrop Grumman

- Raytheon

- Other prominent vendors

PART 22: Case study

- Missing Malaysia Airlines Flight MH370

- Assumptions

PART 23: Appendix

- List of abbreviations
