

"FAIRY" CREATURE DISCOVERED, X-RAYED AND LAB TESTED

"FAIRY" creature discovered in Mexico, lab tested and X Rayed.

PORTER RANCH, CA, USA, July 21, 2016 /EINPresswire.com/ -- FOR IMMEDIATE RELEASE

A unusual creature has been discovered in Mexico. Some wonder if it's alien, but details are currently being released in WATCHERS 10 "DNA" with L.A. Marzulli -- an explosive episodic documentary series on unexplained phenomena that has garnered a loyal cult following. WATCHERS 10 is the latest film in the series and includes information on the [FAIRY](#). Since hoaxes and fake creatures abound, WATCHERS is testing this specimen for DNA at two genetics labs, and it also has been X Rayed and analyzed by a veterinarian. Some of the results can be seen here:

Jaime Maussan, famed UFO journalist has teamed up with WATCHERS to help with the research. Producers L.A. Marzulli and Director Richard Shaw are being interviewed on multiple TV and radio programs.

Along with this story in WATCHERS 10 "DNA," is personal testimony from three former military men that Giants still exist in Afghanistan, including an interview with the host of Coast to Coast AM, George Noory. Additionally, DNA testing of five elongated skulls from Peru to discover their origin -- all of these experiments and research is outlined in WATCHERS 10 "DNA" — evidence that is going viral. The complete WATCHERS series examines ancient texts and uses laboratory testing to confirm or disprove long established norms about the origin of the giants, alien implants, strange creatures, UFOs, the TORAH codes, and much more. A trailer to the film is available here: <https://vimeo.com/166656722>

VIP viewing to the full documentary is available upon request and approval.
