

# Healthcare Security Systems Market Research Report Outlook - Forecast to 2027

---

*The primary reason of protecting the patients is to give them a sense of confidence in the healthcare organization.*

PUNE, MAHARASHTRA, INDIA, July 22, 2016 /EINPresswire.com/ -- Need of healthcare security system:

Privacy and protection both provide a valuable benefit to the society. Healthcare security plays a vital role in improving the healthcare market. Protecting patients from harm and preserving their rights is essential to ethical healthcare. The primary reason of protecting the patients is to give them a sense of confidence in the healthcare organization.

Today's facility managers in hospitals, nursing homes and medical centers are handling multiple responsibilities. These responsibilities may include assessing risks, vulnerabilities and planning oversight of physical security to protect people. Healthcare security deals with constant visitor's traffic, open access in multiple buildings, hectic emergency departments, confidentiality requirements, property and information against political threats. The public has gained an increased awareness in physical security at hospitals and because of this many facility managers and security heads have been asked to increase the level of security measures. Thus healthcare security systems are playing a major role in the protection and security of patients.

Regional market analysis

North America (US)

The pressure of security risks is growing in the Healthcare industry; this is due to Hospitals which are being targeted frequently as they are the have most easily accessible premises. Hospitals have huge infrastructure and most of the major hospitals are in the prominent areas of the city hence they become an obvious target for crime and terrorism, according to the crime and security trends 154 shooting have taken place in hospitals and health care facilities worldwide in 2011, this trend also states that 98% hospitals and healthcare facilities in the United States of America experience crime and terrorism. Thus these institutions and facilities are facing problems in providing treatment and services to their customers and patients with the fear of security. Thus all the healthcare institutes have made it essential to install security systems in their organizations.
