

Mobile Privacy Comes into More Notice in 2016

IObit Applock Safeguards Privacy for Android Phone and Tablet Users with Multiple Lock Options

SAN FRANCISCO, CALIFORNIA, USA, July 21, 2016 /EINPresswire.com/ -- After launched Driver Booster v3.5 at July 18, IObit today released [IObit Applock](#) v1.0 for Android phone and tablet users is available. IObit Applock can protect your privacy and important data by locking any apps, system settings and switches on your Android phone and tablet with a secure pattern or PIN code. You are no longer need to worry about sensitive information been pried by others or system settings messed up by kids.

"A survey based on the users of AMC Security suggests that smartphone privacy protection is top security issue now and 66% of people aged 18-35 think that an applock tool is absolutely necessary for Android devices, " According to Fiona Choo, PM of IObit Applock and AMC Security(a.k.a Advanced Mobile Care, which has more than 20 million users). "Only with one single screen-lock is no longer secure enough for your Android device, everything is freely accessible once people unlocked your screen," Said Fiona.

IObit Applock provides multiple lock options which can satisfy you various demands at your own convenience. If you do not want any other people find out you are using IObit Applock you can always change its icon to a Alarm, Weather or Calculator. And with Intruder Selfie, you will find out who try to unlock your apps.

IObit Applock Features:

- App Lock--Lock any individual app, phone settings and switches to prevent intruders from seeing your private data and kids from messing up your settings even making in-app purchases.
- Fake Lock--Disguise the app lock-screen with Force Stop or Picture Cover from your own gallery.
- Notification Lock--Hide sensitive content of notifications and heads-up from Whatsapp, Messenger and many other apps.
- OTP Lock--One Time Password Lock better protect your app with password valid only for 90 seconds.
- Delay Lock Option--Disable the Applock temporally. Four delay lock options satisfy your own demands when switching between different apps.
