Global Wearable Sensors Market Size, Future Outlook 2011-2021

Wearable Sensors Market, by Type(Image, Motion Sensors), by Application (Smart Wristwear & Glasses), by End Users(Consumer, Healthcare Applications)2016-2021

Market Research Future

PUNE, MAHARASHTRA, INDIA, July 26, 2016 /EINPresswire.com/ -- Study Objectives of Wearable Sensors
- To provide detailed analysis of the market structure along with forecast for the next 10 years of the various segments and sub-segments of the global Wearable Sensors market
- To provide insights about factors affecting the market growth
- To Analyze the Wearable Sensors market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, and Rest of the World (ROW)
- To provide country level analysis of the market with respect to the current market size and future prospective
- To provide country level analysis of the market for segment by Type, Applications, End Users and its sub-segments.
- To provide strategic profiling of key players in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market
- To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the global Wearable Sensors market

Taste the market data and market information presented through more than 70 market data tables and figures spread in 105 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on "Global Wearable Sensors Market Information- From 2011 To 2021"

Market Synopsis of Wearable Sensors

Market Scenario
Wearable sensors market is expected to witness rapid development and mainstream acceptance

in smart textiles. Smart textiles have sensors embedded in fabric, and sports industry is the earliest adopter of e-textiles. With increasing population and awareness towards health, people have started adopting wearable sensors for physiological monitoring, remote patient monitoring and personal healthcare facilities.

The market for global wearable sensors is expected to reach up to $XX million by the end of the forecasted period and is expected to grow at a CAGR of ~40-42%.

The major factors contributing to the market growth are; Rise in Wearable Sensors for Infants, Rise in Home and Remote Patient Monitoring, Rapid Innovations in Sensor Technology, Impact Analysis of Drivers on Market Forecast

Key Findings
- Global wearable sensors market is driven by the rise in home and remote patient monitoring, and technical advancement such as integration of sensors and sensors innovations towards miniaturization.
- Wearable sensors market is expected to witness significant growth in smart glasses application during the forecast period, influenced largely by the launch of Apple Smart Watch in 2015.
- Asia-Pacific is expected to dominate wearable sensors market surpassing the revenues of North America during the forecast period.

Table Of Content

3.5 FORECAST MODEL

4. MARKET DYNAMICS
4.1 DRIVERS
4.2 RESTRAINTS
4.3 OPPORTUNITIES
4.4 MACROECONOMIC INDICATORS

5. MARKET FACTOR ANALYSIS
5.1 VALUE CHAIN ANALYSIS
5.2 PORTERS FIVE FORCES

6. GLOBAL Wearable Sensors: BY Types
6.1 INTRODUCTION
6.2 HISTORIC MARKET GROWTH
6.3 MARKET SIZE (SUB SEGMENTS)
6.3.1 Motion Sensors
6.3.2 Medical Based Sensors
6.3.3 Position Sensors
6.3.4 Pressure Sensors
6.3.5 Inertial Sensors
6.3.6 Other Sensors

7. GLOBAL Wearable Sensors: BY Application
7.1 INTRODUCTION
7.2 HISTORIC MARKET GROWTH
7.3 MARKET SIZE (SUB SEGMENTS)
7.3.1 Smart Wristwear
7.3.2 Smart Glasses
7.3.3 Smart Bodywears
7.3.4 Smart Footwear
7.3.5 Other

Segments
The market for Global Wearable Sensors is segmented in mainly three parts i.e. by type, by application, by end users and its various sub-segments; Segmentation by type include Motion Sensors, Medical Based Sensors, Image Sensors, Position Sensors, Pressure Sensors, Inertial Sensors and Other Sensors. Whereas by application include Smart Wristwear, Smart Glasses, Smart Bodywears, Smart Footwear and Other Wearable Devices. Furthermore by end user

include Consumer Applications, Healthcare Applications and Enterprise and Industrial Applications.

Regional Analysis of Wearable Sensors
North America dominated the Global Wearable Sensors market with the largest market share, accounting for $XX million and is expected to grow over $XX billion by 2027. Asia-Pacific is expected to surpass North America in 2015 to become the largest market for Wearable Sensors and expected to grow at CAGR of XX% from $ XX million in 2016 to $XX million by 2027. The European market for Wearable Sensors is expected to grow at XX% GAGR (2016-2027).

Key Players of Wearable Sensors
The key players that are involved in Global Wearable Sensors market are InvenSense, Inc, NXP Semiconductors, Panasonic Corporation, Robert Bosch GmbH, STMicroelectronics, Texas Instruments Incorporated, KIONIX, INC. (ROHM Co., Ltd.), Measurement Specialties, Inc, Analog Devices, Inc, ZOLL Medical Corporation, Freescale Semiconductor, Inc and Infineon Technologies AG.

About Market Research Future:
At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.
