

Intratec Reveals Costs of Cumene Production From Benzene and Propylene

New report details capital investment and operating costs of a Cumene Plant

HOUSTON, TX, USA, July 29, 2016 /EINPresswire.com/ -- Intratec Solutions LLC, the leading source for chemical markets data and production cost reports, is pleased to announce a new report examining the costs of production of Cumene (Isopropylbenzene).

The new report reviews Cumene production from benzene and refinery grade (RG) propylene via an alkylation process, in which the alkylation step is carried out using a zeolite catalyst. The economic assessment also assumes a plant located in the USA. This detailed study presents plant construction cost, Cumene production cost breakdown, and raw materials consumption figures. It may be extended with supplemental analyses, such as Production Unit Cost Breakdown per Pieces of Equipment and Process Flow Diagrams & Equipment List, among others.

The new study is now part of Intratec portfolio of more than 900 up-to-date, independent and cost-effective reports. Intratec studies can be purchased online at Intratec website, via credit cards.

The content of the new report can be checked at www.intratec.us/analysis/cumene-e15a

For other Intratec reports focused on the costs of production of Cumene via other manufacturing processes, different raw materials, and/or different locations, visit www.intratec.us/analysis/cumene-production-cost

About Intratec Solutions LLC

Intratec (www.intratec.us) is an independent research and leading advisory firm, recognized for excellence in the evaluation of chemical markets and the economics of industrial processes. Since 2002, the production cost reports and online databases we provide have boosted the early recognition of promising research and capital investment opportunities in the chemical, petrochemical, oil, plastic, renewable, alternative energy & allied sectors.
