In this industry research report, the analysts have estimated factors like the development of lactose-free ice cream to aid in the growth of the ice cream market over the forecast period. People with lactose intolerance are unable to digest lactose present in milk. Consumption of lactose leads to several problems like as bloating, diarrhea, and gas. This resulted in several ice-cream manufacturers formulating their lactose-free line of ice creams to cater to this niche market of lactose-intolerant consumers. For instance, Chapman's launched their lactose-free range of ice creams in Canada, whereas the Babcock Hall Dairy Store launched two lactose-free

ice cream flavors in 2013. Therefore, the availability of lactose-free ice creams will aid in the growth of the ice cream market in the coming years.
