Reviving fossil fuel demand is expected to result in a rise in demand for the [Upstream Services market](#). The oil and gas industry has been experiencing severe revenue contraction post April 2014, following oil price decline. Persistent price downfall had a profound impact on the investments in the oil & gas industry, particularly the upstream sector. However, recent adjustments the oil prices have instigated a positive outlook for this industry. Changes in demand-supply dynamics is expected to induce a rise in the number of oil wells, thereby driving the upstream services market. Increasing demand for oil and gas is also expected to fuel the demand in the upstream services market.

Segments

The upstream services market is categorized on the basis of types of services into pressure pumping, tubular goods, waste management, coiled tubing, completion, intervention, well fluids, and wireline. On the basis of type of wells, the market has been segmented as land and offshore.
