Market Synopsis of Investment Analysis of Construction Industry in Indonesia
Indonesia is known as the second most productive and profitable construction market in Asia, where a huge number of construction projects are undergoing in both residential as well as non-residential sectors. For example, one of the head ventures which were started by the property developer named Lippo Karawaci is the Millennium Village and The Global Smart City which is situated on a 70 hectare in Lippon town. The development cost for these projects would be approximately $15 billion. In Indonesia, the construction industry has been growing 8% to 9% annually, due to huge demand for residential properties and growth of the property sector in major cities around the country. The public works investment is a key point in the government's plan to provide water resources, roads and human settlement infrastructure for the long-term development.
