According to the report, Indonesia is known as the second most productive and profitable construction market in Asia, where a huge number of construction projects are undergoing in both residential as well as non-residential sectors. The majority of the market is dominated by non-residential properties approximately around 56.67% in 2015 as compared to residential construction activities.

In Indonesia, the construction industry has been growing 8% to 9% annually, due to huge demand for residential properties and growth of the property sector in major cities around the country. The public works investment is a key point in the government's plan to provide water resources, roads and human settlement infrastructure for the long-term development.
