

Point Motion: To Inspire and Enable

Start-up donates futuristic motion control music technology to help aid developmental needs patients.

BOSTON, MASSACHUSETTS, UNITED STATES, July 27, 2016

/EINPresswire.com/ -- Boston-based tech startup, Golden Wish LLC, is using their new motion control technology, [Point Motion](#), to help patients with autism and other special developmental needs build cognitive function and self-confidence. Using an all new motion control and data tracking system, Point Motion allows people of all ages and disabilities the opportunity to create and immerse themselves in music. After finishing their fundraising campaign, Golden Wish LLC has been able to donate Point Motion to multiple health organizations, where

many of the working professionals have already started talking about the benefits this technology provides.

While many of the new systems being released are complex and incorporate multiple components that must be learned in order to use them, Point Motion's completely wireless approach allows users the freedom to make their own decisions, choose their own movements, and even the music they hear.

“

This technology makes it possible to calibrate responsiveness to the tiniest gesture for our severely restricted patients – or to help kids stretch their limits when the time is right.”

Clarissa Karlsson, MT-BC - Children's National Hospital

[About the Company](#)

“To inspire and enable the creativity and imagination of people around the world.” A Boston-based technology research and development company, Golden Wish LLC was founded in 2013 by CEO, Kevin Clark. Built upon the fundamentals of bringing music to every individual, Clark's drive to bring a universally creative platform to the world set the Golden Wish standard: that all people who can move, no matter how

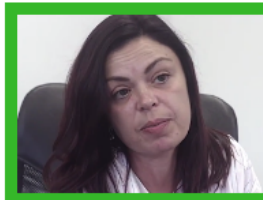

slightly, should have access to self expression.

Asaf Barzilay, CEO - Extreme Reality

“It's not just about being a game or application that tells you what to do and you have to follow; Point Motion is an open platform allowing you to be creative, to express yourself, to bring new ideas to life.”

Kim Nizza, R.N. - Greater Boston Area

“I definitely see it as a great way for kids to express themselves and still do things on their own.”
