

# Webmart Limited achieves ISO 27001 certification with IT Governance's bespoke implementation consultancy service

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, August 1, 2016 /EINPresswire.com/ -- -- IT Governance, the leading provider of cyber security and [ISO 27001](#) expertise, is pleased to congratulate Webmart Limited on the successful certification of its ISO 27001 information security management system.

Alan Calder, founder and executive chairman of IT Governance, says: "We are delighted to have supported Webmart Limited with their ISO 27001 ISMS implementation process. Achieving this certification is a remarkable achievement for any business, and proof that Webmart's information security management system (ISMS) meets the requirements of this demanding international standard."

ISO 27001 is the international best-practice framework that allows organisations to coordinate security efforts to systematically and consistently protect their information assets and customers' data. The Standard encompasses people, processes and technology, which gives organisations a competitive edge by defending against the evolving nature of information security threats.

Jake Chandler, account executive of Webmart Limited said: "Webmart needed to achieve ISO 27001 certification in record time and after some due diligence, we opted for IT Governance as they offered a competitive price and guaranteed us an audit pass within our tight schedule. We decided to go with a bespoke package due to the limited knowledge of management systems regarding Information Security. This gave us access to an extremely capable consultant who would visit our site on the agreed days and then help work through all aspects of getting the ISMS ready for audit."

The [bespoke ISO 27001 Implementation Consultancy service](#) is designed to allow organisations to take full advantage of IT Governance's experience and expertise, from setting up the project through accredited certification and beyond, ensuring the development of the organisation's resources and skills to continue running the ISMS post-certification.

"This approach I found extremely beneficial as instead of it all being done for you and handed over and you the having no understanding of the process, the consultant guides you through each element and you have a much better understanding. With the consultant's expert help we were able to go from beginning to completion within 8 weeks. Overall I could not recommend ITG enough, their service and performance is second to none." Jake Chandler continued.
