IoT in Smart Appliances is the main factor driving the market.

High adoption rate of IoT in smart home is the key driver for the smart appliances market. As companies are discovering new technologies and implementing it into the smart appliances, this market will grow with the rapid pace. Another factor which is driving the market is increase in the disposable income of people in Asia-Pacific is also the major factor.

Europe is expected to give high competition to the Asia-Pacific. However, North America will hold third position in the market.

Asia-Pacific and North America will be close competition from 2016 to 2027. However, it is anticipated that North America will continue to dominate over Asia-Pacific by 2027. As of 2015/2016 U.S. and Canada are the leading countries with respect to revenue generation and market penetration across the globe. Though, these countries' markets are expected to be mature, and the industry will find stagnant growth for this market after next five year. However, the continual technology development may still enhance the growth of these markets.
