

# Meth Lab Cleanup Company Invited to Speak at the SE Home Inspectors Conference

*AccuMeth® is an easy-to-use, nonhazardous, immediate result home methamphetamine test with a detection level recognized by all regulated states in the nation.*

ATHOL, IDAHO, UNITED STATES, August 3, 2016 /EINPresswire.com/ -- Meth Lab Cleanup® Company has been asked to speak at the 10th Anniversary South Eastern Home Inspectors Conference – Home Inspectors Offering Meth Lab Testing.

AccuMeth® is an easy-to-use, nonhazardous, immediate result home methamphetamine test with a detection level recognized by all regulated states in the nation.

Athol, ID: Meth Lab Cleanup® Company (MLCC) offers AccuMeth® Immediate (patent pending) an onsite immediate result home meth test of superb quality and performance. Meth Lab Cleanup®'s onsite kit utilizes a lateral-flow immunoassay, visually-read application; much like a pregnancy test. Now, child protective services, law enforcement, renters, landlords, realtors, home inspectors, prospective buyers and clandestine drug lab technicians can have highly reliable, semi-quantitative results within four minutes of application. Test results are positive or negative for methamphetamine residue at 0.1 µg/100cm<sup>2</sup>; the most recognized legal standard in the nation.

AccuMeth® Immediate meth test kit is complete with everything needed to obtain a representative sample. This includes sampling materials, protective gloves, templates, and easy to follow instructions. For additional assistance, customers can also watch MLCC's instruction videos posted on the AccuMeth® website at <http://www.accumeth.com>.

According to Julie Mazzuca, President, Meth Lab Cleanup®, "AccuMeth® Immediate is much easier to use than other onsite meth tests. And after use, the components are considered common household waste unlike our competitor's kit which must be disposed of as hazardous. Also, given the precision, our kits are the most affordable on the market."

Meth Lab Cleanup® Company leads the clandestine drug lab assessment and decontamination industry in technology development initiatives focusing on environmentally friendly applications, equipment, methodology and testing products. In addition to AccuMeth® Immediate, MLCC offers the AccuMeth® 2-Day meth test kit. After use, the sample is mailed \*\* for analysis to an independent, SAMSHA/EPA accredited laboratory which can detect methamphetamine residue to levels below 0.02 µg/100cm<sup>2</sup>. Results are available by email within two days of receipt.

Meth Lab Cleanup® Company is an environmental firm on the forefront of the clandestine drug lab decontamination industry. Recognized for excellent customer service and industry-leading technical expertise, Meth Lab Cleanup® has been specializing in comprehensive site assessment, work plan development, regulatory adherence, full service decontamination and quality documentation for over 10 years. Visit our website at <http://www.methlabcleanup.com>.
