

Monkeetech Releases New Website Full of Content and Demos for their Patented Product Send2mobile+™

MonkeeTech Revolutionizes mobile commerce with Send2Mobile+™ "Let Me Know" and Make an Offer solutions.

WEST BABYLON, NEW YORK, UNITED STATES, August 9, 2016 /EINPresswire.com/ -- MonkeeTech LLC has just released online demos for its exciting new patented applications called "Let Me Know" and "Make an Offer," which run on its Send2Mobile+™ platform and allow anyone to make purchases via their mobile SMS/MMS messaging devices. Software developers, investors and business owners can now discover how this patented technology breakthrough will transform the customer online shopping experience by making engagement much easier and more appealing.

MonkeeTech's creators sought to improve the world of e-commerce by making it more interactive, personal and fun. Their new website www.MonkeeTech.com showcases how they accomplished that with a total of [four product demos](#). These recently patented products known

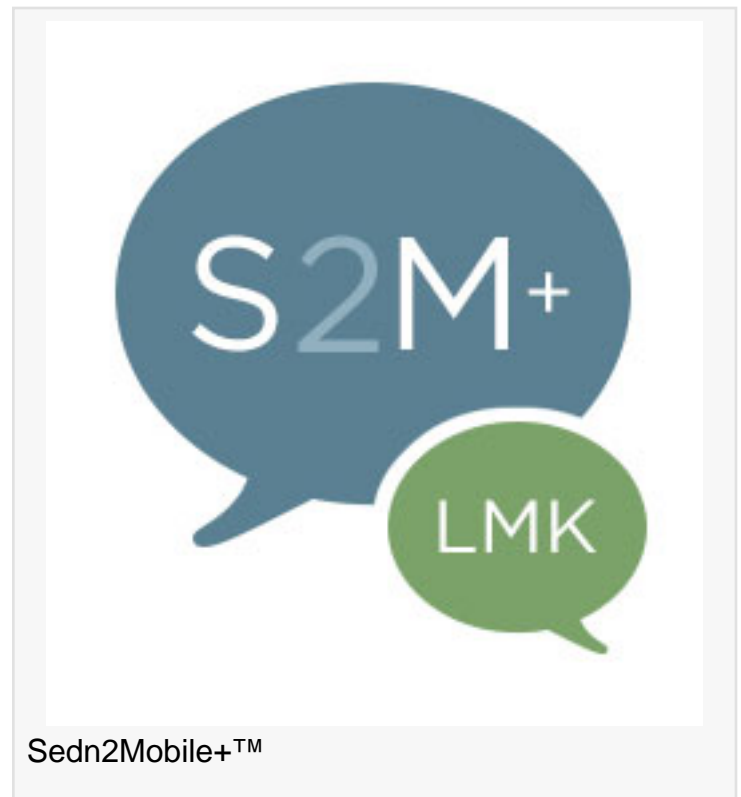

MonkeeTech LLC

as "Make an Offer" and "Let Me Know" are their hottest offerings, and the four demos here illustrate how this new platform will change online shopping, auctions, sporting-event ticket sales and travel planning, just to name a few. With these patented solutions, any merchant will be able to send special offers through texts or multimedia messaging directly to the mobile devices of their interested customers. Customers can buy faster just by replying to these messages, because the service arranges to keep their credit-card information securely on file for easy payment processing. The "Let Me Know" solution acts like a subscription service for people seeking out the latest deals from their favorite brands. Even more engaging is the "Make an Offer" solution that revolutionizes crowdfunding, online auctions and retail-store clearances. With "Make an Offer", deal-seekers get the chance to name their price to purchase for whatever the merchant may offer. When the merchant agrees with their offered price, the buyer receives a text-message notification. Within seconds, buyers can then reply to the text- message and purchase their goods or services.

The Founders of MonkeeTech are a father-and-son team: CEO Jeffrey N. Dinardo Jr. and Co-Founding Partner Jeffrey N. Dinardo Sr. Both founders are confident about the potential capabilities of their software as they explain that:

"We want to show the world how Send2Mobile+™ and our two solutions 'Make an Offer' and 'Let Me Know' will change mobile commerce as we know it. From our own experience, we realize we have something special, and we are looking forward to sharing it with the world."

While the MonkeeTech startup group has successfully patented these solutions, they have not yet officially released them to the public. The Monkeetech group does plan to also release extensions for additional e-commerce websites like Shopify and Magento later this year, so that website owners can start using Send2Mobile+ on their own websites. Once more merchants and consumers [try the demos](#) and register their feedback, MonkeeTech will further customize its offerings while preparing to go to market. For more details, contact Founding Partners Jeff Dinardo Jr. and Jeff Dinardo Sr. at (650) 762-5271.

In 2012, CEO Jeff Dinardo Jr. founded MonkeeTech with Executive Vice President and Partner Jeff Dinardo Sr. First, they wanted to boost customer engagement and brand awareness on their own website: www.QualityDoor.com. They came up with the highly successful Send2Mobile+™ platform and products such as the "Make an Offer" and "Let Me Know" apps to allow consumers to purchase goods and services via their mobile-messaging devices. These products are easily scalable across many industry sectors and can greatly increase customer engagement.

We want to show the world how Send2Mobile+™ and our two solutions 'Make an Offer' and 'Let Me Know' will change mobile commerce as we know it.
