PUNE, INDIA, August 10, 2016  
/EINPresswire.com/ -- About [Stem Cell Therapy Market](#)

## Summary

According to Statistics MRC, the stem cell therapy market is expected to grow at a CAGR of 37.6% during the forecast period 2015 to 2022. Rising awareness about stem cell therapies is the key factor driving the market growth. Furthermore, rising prevalence of chronic diseases, increasing approvals of clinical trials for stem cells therapy, increasing funds from government and private organizations, technological advancements and rising focus towards human embryonic stem cells are some of the drivers fuelling the market growth. However, complications in preservation of stem cells and lack of required infrastructures are the restraints hampering the market growth. Evolution of new therapies and low regulatory frameworks in emerging regions are expected to provide opportunities for market growth over the forecast period.
