BluStor™ & Arrow Electronics establish a strategic supply chain collaboration

CHICAGO, IL, USA, August 11, 2016 /EINPresswire.com/ -- [BluStor™](#) & Arrow Electronics establish a strategic supply chain collaboration to accelerate [BluStor's CyberGate Personal Mobile Cloud Platform \(PMC\)](#)

Chicago, IL – BluStor™ a leader in harnessing [multi-factor biometric authentication](#), authorization and data security within smart card solutions, and Arrow Electronics, a global provider of electronic components, services and enterprise computing solutions, have collaborated to target the fast-growing, multi-factor biometric authentication market.

Finis Conner, the founder and CEO of BluStor, is a veteran of the technology industry having co-founded and founded two fortune 500 companies, including Seagate Technology and Conner Peripherals. The father of the modern-day hard drive, Finis led Conner Peripherals to become the fastest growing manufacturing start-up in U.S. history, surpassing \$1.3B in sales in just four years.

“BluStor’s strategic collaboration with one of the world’s leading supply chain services’ company in this era of technology commoditization is a major advancement. It will allow us to scale quickly, knowing that we can maintain the highest level of manufacturing quality, no matter how fast we grow,” Conner said. “Working with Arrow will allow BluStor to build, manage and distribute the CyberGate Personal Mobile Cloud platforms—enabling faster time to market, accelerated revenue growth and increased flexibility at a lower total cost.”

This collaboration provides BluStor with access to Arrow’s extensive global network of components suppliers, contract manufacturers and commercial customers across Arrow’s 460 locations, which serve over 85 countries.

BluStor’s CyberGate Personal Mobile Cloud (PMC) targets the often overlooked fact that individuals will always be the weakest link in the security chain. Setting itself apart from most of its competitors, BluStor’s solution focuses on securing the individual at the point of every mobile transaction by requiring users to seamlessly prove their identity and that their actions are authorized.

About BluStor

BluStor CyberGate Personal Mobile Cloud (PMC) is the only cyber security solution you need in the digital and mobile world.

Designed for government, enterprise, healthcare, medical, telecom and financial services markets, the CyberGate PMC platform is the first – and only – solution to address the full array of digital security: device, user and data.
