

# Live Webinar On “Mixing Tank – Scale up Your Mixing Process” For The Process Industry

SAN ANTONIO, TX, UNITED STATES, August 8, 2016 /EINPresswire.com/ -- Tridiagonal Solutions Inc, a global chemical process enhancement solutions provider, will be hosting a live free webinar on “[Mixing Tank – Scale up Your Mixing Process](#)” on 31st August, 2016 from 9:00 am to 10:00 am CST, 4:00 pm – 5:00 pm CEST and 3:00 pm – 4: 00 pm UK.

Chemists and Chemical Engineers are focused on transforming raw materials into value added products. Stirred tank is one of the widely used unit operation for these transformations. Recipes are developed in the lab and then transferred to the production units. Such differences can make scale-up from the laboratory or pilot plant challenging. Process Engineers will need to fit this recipe in an existing tank; and depending on the production site, the available configurations would change. So the same product will need to be made in tanks of various configurations and this can be challenging. Various methods are available to evolve the design/operating condition for the production scale vessel.

This webinar will provide insights on various scale-up rules available for different batch mixing processes. Methods to scale-up batch mixing processes from lab to pilot plant to production and how to apply the available scale-up methods for successful scale-ups. Examples demonstrating the successful use of mixing scale-up techniques for stirred tanks in the Pharmaceutical, Bio-Pharma, Bio-Technology and Chemical (specialty, fine and consumer) industries will be presented.

About Tridiagonal Solutions Inc

Tridiagonal Solutions Inc is an advanced engineering solutions provider with expertise in process performance enhancement and product development solutions for industrial clients worldwide. Their portfolio includes process engineering, CFD, EFD, DEM services and [chemical mixing simulation](#) products. Tridiagonal Solutions caters to the Chemical and Process, Oil and Gas, Consumer goods, Food, Electronics, Power Generation and Healthcare Industries.

For more information please visit [mixit.tridiagonal.com](http://mixit.tridiagonal.com) or call (210) 858-6192.
