

Intratec Reveals Costs of Propylene Production From Propane

New report details capital investment and operating costs of a Propylene plant

HOUSTON, TX, USA, August 16, 2016 /EINPresswire.com/ -- Intratec Solutions LLC, the leading source for chemical markets data and production cost reports, is pleased to announce a new report examining the costs of production of Propylene.

The new report examines the costs related to Polymer Grade (PG) Propylene production from propane in the USA. The process examined in this report is carried out in a fixed-bed reactor, similar to CB&I Lummus CATOFIN. This detailed study presents plant construction cost, Propylene production cost breakdown, and raw materials consumption figures. It may be extended with supplemental analyses, such as Production Unit Cost Breakdown per Pieces of Equipment, Process Flow Diagrams & Equipment List, and analyses providing capital & production costs in several countries.

The new study is now part of Intratec portfolio of more than 900 up-to-date, independent and cost-effective reports. Intratec studies can be purchased online at Intratec website, via credit cards.

The content of the new report can be checked at www.intratec.us/analysis/propylene-e32a

For other Intratec reports focused on the costs of production of Propylene via other manufacturing processes, different raw materials, and/or different locations, visit www.intratec.us/analysis/propylene-production-cost

About Intratec Solutions LLC

Intratec (www.intratec.us) is an independent research and leading advisory firm, recognized for excellence in the evaluation of chemical markets and the economics of industrial processes. Since 2002, the production cost reports and online databases we provide have boosted the early recognition of promising research and capital investment opportunities in the chemical, petrochemical, oil, plastic, renewable, alternative energy & allied sectors.
