

Intratec Discloses Costs of Butenes Production From Ethylene

New report details capital investment and operating costs of a Butene plant

HOUSTON, TX, USA, August 17, 2016 /EINPresswire.com/ -- Intratec Solutions LLC, the leading source for chemical markets data and production cost reports, is pleased to announce a new report examining the costs of production of Butene.

The new report presents the economics of Butenes production from ethylene using a dimerization process similar to CB&I Lummus process. In the process under analysis, gasoline and fuel oil are generated as by-products. The economic analysis assumes a plant constructed in the USA.

This detailed study presents plant construction cost, Butene production cost breakdown, and raw materials consumption figures. It may be extended with supplemental analyses, such as Production Unit Cost Breakdown per Pieces of Equipment, Process Flow Diagrams & Equipment List, and analyses providing capital & production costs in several countries.

The new study is now part of Intratec portfolio of more than 900 up-to-date, independent and cost-effective reports. Intratec studies can be purchased online at Intratec website, via credit cards.

The content of the new report can be checked at www.intratec.us/analysis/butene-e11a

For other Intratec reports focused on the costs of production of Butene via other manufacturing processes, different raw materials, and/or different locations, visit www.intratec.us/analysis/butene-production-cost

About Intratec Solutions LLC

Intratec (www.intratec.us) is an independent research and leading advisory firm, recognized for excellence in the evaluation of chemical markets and the economics of industrial processes. Since 2002, the production cost reports and online databases we provide have boosted the early recognition of promising research and capital investment opportunities in the chemical, petrochemical, oil, plastic, renewable, alternative energy & allied sectors.
