

Automated Test Equipment (ATE) Market by Type, Component, Application Forecast 2022

Automated test equipment (ATE) Market Research Report- Global Forecast to 2022

PUNE, INDIA, August 22, 2016 /EINPresswire.com/ -- [Global Automated Test Equipment \(ATE\) Market](#)

Objective of Automated test equipment (ATE) Market Study:

- To provide detailed analysis of the market structure along with forecast for the next 10 years of the various segments and sub-segments of the Global Automated test equipment (ATE) market.
- To provide insights about factors affecting the market growth.
- To analyze the Automated test equipment (ATE) Market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, and Rest of the World (ROW).

- To provide country level analysis of the market with respect to the current market size and future prospective.
- To provide country level analysis of the market for segment by component, by types, by application and sub-segments.
- To provide strategic profiling of key players in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market
- To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the Global Automated test equipment (ATE) market.

Key Players

Some of the major players in Global Automated test equipment (ATE) Market include Cobham Plc (UK), Astronics Test Systems, Inc. (US), Agilent Technologies Inc., Aeroflex Inc.(U.S.), Teradyne Inc.(U.S.), Chroma ATE Inc.(Taiwan), Advantest Corporation (Japan), LTX-Credence Corporation (US), Roos Instruments, Inc. (US), and National Instruments Corporation (US) among others.

Market Synopsis of Automated test equipment (ATE) Market:

Market Scenario

The major growth driver of Automated test equipment (ATE) Market includes growing demand for efficient power management, growing demand for smartphone which is accelerating market for semiconductors, and growing market of consumer electronics among others.

Hence the market for Automated test equipment (ATE) is expected to grow at XX% CAGR (2016-2022).

However, technical limitation such as short battery life and constant change in technology sector are some of the major factors which are hindering the growth of Automated test equipment (ATE) Market.

Solutions to your queries @ <http://www.marketresearchfuture.com/enquiry/automated-test-equipment-ate-market-research-report-global-forecast-to-2022>

Segments

Global Automated test equipment (ATE) Market can be segmented as follows:

Segmentation by Components: adapters, controllers, tester, prober, and semiconductor among others.

Segmentation by Types: logic chip, memory, digital and mix among others.

Segmentation by Application: consumer electronics, automotive, aerospace & defense, medical among others.

Regional Analysis of Automated test equipment (ATE) Market:

Asia-Pacific is expected to dominate the Global Automated test equipment (ATE) Market with the largest market share due to presence of large semiconductor sectors in the region, and therefore accounting for \$XX million and is expected to grow over \$XX billion by 2022. Automated test equipment (ATE) Market in North America market is expected to generate high growth rate of CAGR of XX% from \$ XX million in 2016 to \$XX million by 2022. The Europe market for Automated test equipment (ATE) Market is expected to grow at XX% CAGR (2016-2022).

Industry News:

- Cobham Plc has launched integrated testing solution with TRX system in August 2016. The testing solution would reduce the time frame of LMR indoor testing.
- Astronics Test Systems has announced in June 2016 that it has purchased signal switching product line from Giga-tronics. This switching product line would provide opportunity for the company to produce new core architecture in integrated test system especially for military and aerospace sectors.
