Global Wearable Sensors Market to Expand at 42% CAGR during 2011-2021

Wearable Sensors Market, by Type (Image Sensors, Motion Sensors), by Application (Smart Wristwear, Smart Glasses), by End Users - Global Forecast 2016 to 2021

PUNE, MAHARASHTRA, INDIA, August 23, 2016 /EINPresswire.com/ -- Study Objectives of Wearable Sensors

> InvenSense, Inc, NXP Semiconductors, Panasonic Corporation, Robert Bosch GmbH, STMicroelectronics, Texas Instruments Incorporated, KIONIX, INC. (ROHM Co., Ltd.), Measurement Specialties, Inc"
>
> *Market Research Future*

•To provide detailed analysis of the market structure along with forecast for the next 10 years of the various segments and sub-segments of the global Wearable Sensors market
•To provide insights about factors affecting the market growth
•To Analyze the Wearable Sensors market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
•To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, and Rest of the World (ROW)

•To provide country level analysis of the market with respect to the current market size and future prospective
•To provide country level analysis of the market for segment by Type, Applications, End Users and its sub-segments.
•To provide strategic profiling of key players in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market.

Market Scenario
Wearable sensors market is expected to witness rapid development and mainstream acceptance in smart textiles. Smart textiles have sensors embedded in fabric, and sports industry is the earliest adopter of e-textiles. With increasing population and awareness towards health, people have started adopting wearable sensors for physiological monitoring, remote patient monitoring and personal healthcare facilities.
The market for global wearable sensors is expected to reach up to $XX million by the end of the forecasted period and is expected to grow at a CAGR of ~40-42%.
The major factors contributing to the market growth are; Rise in Wearable Sensors for Infants, Rise in Home and Remote Patient Monitoring, Rapid Innovations in Sensor Technology, Impact

Analysis of Drivers on Market Forecast.

Key Findings
•Global wearable sensors market is driven by the rise in home and remote patient monitoring, and technical advancement such as integration of sensors and sensors innovations towards miniaturization.
•Wearable sensors market is expected to witness significant growth in smart glasses application during the forecast period, influenced largely by the launch of Apple Smart Watch in 2015.
•Asia-Pacific is expected to dominate wearable sensors market surpassing the revenues of North America during the forecast period.

Regional Analysis of Wearable Sensors
North America dominated the Global Wearable Sensors market with the largest market share, accounting for $XX million and is expected to grow over $XX billion by 2027. Asia-Pacific is expected to surpass North America in 2015 to become the largest market for Wearable Sensors and expected to grow at CAGR of XX% from $ XX million in 2016 to $XX million by 2027. The European market for Wearable Sensors is expected to grow at XX% GAGR (2016-2027).

Taste the market data and market information presented through more than 50 market data tables and figures spread in 105 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on "Global Wearable Sensors Market Information- From 2011 To 2021"

Key Players of Wearable Sensors
The key players that are involved in Global Wearable Sensors market are InvenSense, Inc, NXP Semiconductors, Panasonic Corporation, Robert Bosch GmbH, STMicroelectronics, Texas Instruments Incorporated, KIONIX, INC. (ROHM Co., Ltd.), Measurement Specialties, Inc, Analog Devices, Inc, ZOLL Medical Corporation, Freescale Semiconductor, Inc and Infineon Technologies AG.

Reasons to Purchase this report:
From an insight perspective, this research report has focused on various levels of analyses—industry analysis (industry trends), market share analysis of top players, supply chain analysis, and company profiles, which together comprise and discuss the basic views on the

competitive landscape, emerging and high-growth segments of the Wearable Sensors Market, high-growth regions, and market drivers, restraints, and opportunities.

Global Smartphone Display Market Research Report- Global Forecast 2022
Mobile phone display market has been growing significantly from the last decade but with the introduction of smartphone, this market has outburst all the previous figures and currently growing with the rapid speed. As the demand for the smartphones are increasing, the market for the displays is also increasing simultaneously. Samsung is leading in the supply of smartphone display around the world with the market share of XX%.Currently, Asia-Pacific is dominating the market of smart phone display market with the market share of XX% in the year 2015. High demand for smartphone from Asian countries such as China, India, Japan are some of the major factor which is driving the market of smartphone display market. North America stands as second biggest market for the smart phone display as the smartphone penetration rate in US is 68% and in Canada 67%.Know more about this report @
