PUNE, INDIA, August 24, 2016 /EINPresswire.com/ -- About [Steam Traps](#)

A steam trap is basically a kind of automatic valve that filters out condensed steam or condensate along with non-condensable gases like air without letting the steam escape. In industries, steam is regularly used for heating or as a driving force for mechanical power. Steam traps are used in industrial applications to ensure that the steam produced is not wasted.
