OSS-BSS Software Market 2016 Analysis and Forecast to 2020

Analysts forecast the global OSS-BSS software market to grow at a CAGR of 18.52% during the period 2016-2020.

PUNE, INDIA, August 24, 2016 /EINPresswire.com/ -- OSS-BSS Software

OSS refers to a specialized software through which a telecom network supports various components within the system such as network operations, service management, and provisioning services, whereas BSS refers to the software that handles tasks such as customer support processes, billing services, order management, and fraud management. These systems support in streamlining operations and implementing service fulfillment. These applications are extensively helpful to manage complex networks and IT infrastructure, service delivery, and customer support. Therefore, telecom operators are investing billions of dollars in revamping their traditional network solutions.
