

Refining Catalyst Industry Key Vendors, Market Driver, Challenge Analysis forecast 2021

Latest News on Refining Catalyst Industry Global Research Report 2016

PUNE, INDIA, August 25, 2016 /EINPresswire.com/ -- [Global Refining Catalyst Industry](#)

Analysts forecast the global refining catalyst market to grow at a CAGR of 3.28% during the period 2016-2020. A catalyst can be defined as a component that accelerates a chemical reaction without taking part in the process. The amount of catalyst required is small compared to the amount of reactants. In most cases, the entire quantity of catalyst is recovered at the end of the reaction process. In refining, catalysts play an important role in cracking heavy carbon chains into lighter products such as diesel and gasoline. Hence, these are mostly used in processes subsequent to the post atmospheric and vacuum distillation units.
