

# Global Transplantation Diagnostics Market 2016 Share, Trend, Segmentation and Forecast to 2022

*Transplantation Diagnostics Market (Material, Production, Geography) 2016 Analysis and Forecast to 2022*

PUNE, INDIA, August 26, 2016

[/EINPresswire.com/](http://EINPresswire.com/) -- Transplantation is a surgical procedure of transferring organ, tissue or cell taken from one part of the body and grafted into another area of the same individual or another individual of same species or different species. The solid organ, tissue and stem cell transplantation field has evolved from a clinical experiment to routine and reliable practice, which has proven to be clinically effective, life-saving and cost-effective. The [transplantation diagnostics](#) market is segmented based on the technology, product type, applications, end users and geography. By technology the market is divided into molecular and non-molecular methods. By application, the transplantation diagnostics market is divided into diagnostic and research segments. By product the transplantation diagnostics market is divided into instruments, consumables, software and services, assays and kits. By end users the transplantation market is segmented into hospital and transplant centres, Research laboratories and academic institutes. Geographical wise, the transplantation market is segmented into North America, Europe, Asia-Pacific and rest of the world.

Complete report details @ <https://www.wiseguyreports.com/reports/619185-transplantation-diagnostics-global-market-forecast-to-2022> □

Among the transplantation diagnostics by technology, the non-molecular method is dominating the market by occupying a largest share and the molecular method is expected to grow at a highest CAGR from 2015 to 2022. The transplantation diagnostics market by product type is segmented into three major divisions such as instruments, consumables and software & services. Among these, consumables accounts for largest share and is growing at a strong CAGR from 2015 to 2022. By applications, is segmented into two major divisions such as diagnostic and research. Among these, diagnostic accounts for largest share as well as fastest growing segment. The end-users market of transplantation diagnostics market is segmented into three major divisions, hospital & transplant centres, diagnostic laboratories and research laboratories & academic institutions. Among these, hospital and transplant centres accounts for largest share and growing at a strong CAGR.

The transplantation diagnostics market is expected to grow at a high double digit CAGR to reach \$2,059.2 million by 2022. The factors driving the growth of this market are high incidence of organ and tissue transplantation procedures across the world, increasing geriatric population, coupled with an increasing population base for chronic disease, increasing healthcare awareness are likely to propel the market. In addition to this, increasing demand for early detection through non-invasive testing procedures like cell free DNA, increase in the number of deals by collaborations and acquisitions to open an array of opportunities for the market to flourish are some of the opportunities that are propelling the growth of the market. However, lack of trained health care professionals, ethical issues related to transplantation, high cost and non-affordability in developed as well as in low- and middle-income countries and unfavourable reimbursement policies are hampering the growth of the market. The threats for the transplantation diagnostics market include the significant gap between the number of organs donated and the number of organs required.

The transplantation diagnostics market is a highly competitive market and all the existing players in this market are involved in developing new and advanced assays to maintain their market shares. The major players in the transplantation diagnostics market include Abbott Laboratories, Inc. (U.S.), Biofortuna Ltd (U.K.), Bio-Rad Laboratories, Inc. (U.S.), CareDx, Inc. (U.S.), Illumina, Inc. (U.S.), Immucor, Inc.(U.S.), Linkage biosciences (U.S.), Qiagen N.V. (Netherlands), Roche (Switzerland), Thermo Fisher Scientific, Inc. (U.S.).

The report provides an in depth market analysis of the above mentioned segments across the following regions:

- North America
- Europe
- Asia-Pacific
- Rest of the World (RoW)

Key points in table of content

1 EXECUTIVE SUMMARY	21
2 INTRODUCTION	31
2.1 KEY TAKE AWAYS	31
2.2 REPORT DESCRIPTION	31
2.3 MARKETS COVERED	33
2.4 STAKEHOLDERS	35
2.5 RESEARCH METHODOLOGY	35
2.5.1 MARKET SIZE ESTIMATION	36
2.5.2 MARKET CRACKDOWN AND DATA TRIANGULATION	39
2.5.3 SECONDARY SOURCES	40
2.5.4 PRIMARY SOURCES	41
2.5.5 KEY DATA POINTS FROM SECONDARY SOURCES	41
2.5.6 KEY DATA POINTS FROM PRIMARY SOURCES	42
2.5.7 ASSUMPTIONS	42
3 MARKET ANALYSIS	44
3.1 INTRODUCTION	44
3.2 MARKET SEGMENTATION	46
3.3 FACTORS INFLUENCING MARKET	47
3.3.1 DRIVERS AND OPPORTUNITIES	47
3.3.1.1 Increase in the rate of solid organ, tissue and stem cell transplantation	47
3.3.1.2 Increase in geriatric population coupled with chronic diseases	48

- 3.3.1.3 Increase in research grants and funding 49
- 3.3.1.4 Increasing demand for early detection through non-invasive testing procedures using cell-free DNA 50
- 3.3.1.5 Growing awareness among people for organ donation and increase in healthcare expenditure 51
- 3.3.1.6 Technological shift from serological assays to gene-based HLA profiling 52
- 3.3.2 RESTRAINTS AND THREATS 52
  - 3.3.2.1 High device cost and non-affordability 52
  - 3.3.2.2 Limited medical reimbursements for organ donation and transplantation procedures 53
  - 3.3.2.3 Ethical issues related to transplantation 54
  - 3.3.2.4 Significant gap between the number of organs donated and the number of organs required annually is a major challenge limiting the growth of the global transplant diagnostic market 55
- 3.4 REGULATORY AFFAIRS 56
  - 3.4.1 U.S. 56
  - 3.4.2 EUROPE 57
  - 3.4.3 INDIA 58
  - 3.4.4 CHINA 59
  - 3.4.5 JAPAN 59
- 3.5 PORTERS FIVE FORCE ANALYSIS 60
  - 3.5.1 THREAT OF NEW ENTRANTS 61
  - 3.5.2 THREAT OF SUBSTITUTES 62
  - 3.5.3 COMPETITIVE RIVALRY 63
  - 3.5.4 BARGAINING POWER OF SUPPLIERS 63
  - 3.5.5 BARGAINING POWER OF BUYERS 64
- 3.6 MARKET SHARE ANALYSIS BY MAJOR PLAYERS 65
- 3.7 RECENT AND UPCOMING PRODUCTS 67
- 4 TRANSPLANTATION DIAGNOSTICS GLOBAL MARKET, BY TECHNOLOGY 71
  - 4.1 INTRODUCTION 71
  - 4.2 MOLECULAR METHODS 74
    - 4.2.1 PCR BASED MOLECULAR METHODS 78
      - 4.2.1.1 SSP-PCR 82
      - 4.2.1.2 SSO-PCR 84
      - 4.2.1.3 Others 86
        - 4.2.1.3.1 SNP-PCR 86
        - 4.2.1.3.2 RFLP-PCR 87
    - 4.2.2 SEQUENCING BASED MOLECULAR METHODS 89
      - 4.2.2.1 NGS 92
      - 4.2.2.2 SANGER SEQUENCING 95
  - 4.3 NON-MOLECULAR METHODS 99
    - 4.3.1 SEROLOGICAL TESTS 102
    - 4.3.2 MIXED LYMPHOCYTE CULTURE ASSAY 105
    - 4.3.3 FLOW CYTOMETRY 106
