

# Indagem Tech Launches Indiegogo Campaign to Fund Mobile Security Lost-Item Tracker System

*Company Offering Innovative Big Data and Cloud Based Mobile Security and Tracking Solution*

BOCA RATON, FLORIDA, UNITED STATES, August 29, 2016

/EINPresswire.com/ -- BOCA RATON - Indagem Tech has announced a new [Indiegogo](#) campaign to fund the production of UMS (Universal Monitoring System) HomeShield. The mobile security and item tracking system allows homeowners to protect both their home and their valuables.

"We have owned and tested other lost-item trackers and Do-it-YourSelf security products and felt underwhelmed with their features and capabilities. We were convinced there had to be a better way," said Kevin Borwick, Co-Founder of [UMS HomeShield](#).

UMS HomeShield utilizes small, wireless sensors to attach to any item that needs monitoring or tracking. The UMS gateway then receives signals on all of the sensors, alerting the owner of any movement. The system also allows people to send an emergency alert to friends and family in the event of danger, sending real-time location information as well. Sensors are water resistant, have a working range of up to 300 feet out in the open, and have a battery life of 9 months to 1 year depending on power consumption.

Indagem Tech's Indiegogo campaign has a goal of raising \$250,000 over the course of the next two months. "The funding received will go toward production of UMS HomeShield and our unique social media alert system," said Borwick. Donors can receive UMS HomeShield products including sensors, gateways, and Bluetooth range extenders as a thank you for their contribution.
