

## Intratec Reveals Production Costs of Green Chemicals and Biofuels

New reports evaluate the economic feasibility of chemicals manufacturing through alternative, bio-based routes

HOUSTON, TX, USA, August 30, 2016 /EINPresswire.com/ -- Intratec Solutions LLC, the leading source for chemical markets data and production cost reports, is pleased to publish new reports examining the costs of production of Green Chemicals and Biofuels.

The new reports provide estimates of capital investments (CAPEX) and operating costs (OPEX) of industrial plants producing chemicals and fuels from renewable sources, through several production processes including emerging technologies.

More than 150 reports were published, covering the costs of manufacturing:

- Bio-based fuels (e.g. bioethanol, biobutanol, and others, including biodiesel and syngas)

- Green building blocks (e.g. <u>green ethylene</u>, bio-succinic acid, and others, including furandicarboxylic acid - FDCA)

- Bioplastics (polylatic acid – PLA, <u>polyethylene furanoate</u> - PEF, and others, including polyhydroxybutyrate – PHB)

- Other chemicals from biomass (e.g. bio-adipic acid, bio-butanediol and others, including biomethionine, lysine)

These new studies are part of Intratec portfolio of more than 900 up-to-date, independent and costeffective reports. Intratec studies can be purchased online at Intratec website, via credit cards.
