About the 5-Star Rating System

The Center for Medicare and Medicaid Services is a division of the Department of Health and Human Services. One of its charges is to monitor and rate nursing facilities nationwide. CMS created the Five-Star Quality Rating System to help consumers, their families, and caregivers compare nursing homes more easily and to help identify areas about which you may want to ask questions.

The Nursing Home Compare website features a quality rating system that gives each nursing home a rating of between 1 and 5 stars. Nursing homes with 5 stars are considered to have top-tier quality, and nursing homes with 1 star are considered to have quality much below average. There is one overall 5-Star rating for each nursing home.
