## Description

Wiseguyreports.Com Adds “Liquid Detergent Chemicals -Market Demand, Growth, Opportunities and analysis of Top Key Player Forecast to 2021” To Its Research Database

Liquid detergent chemicals are ingredients that constitute a liquid detergent and play a key role in its physical and chemical properties and functionality. Although liquid detergents currently account for only a small share (20%-25%) of the overall laundry detergents market, the rapid growth of this segment differentiates it from other segments like traditional powder and other forms of detergents. This is primarily because liquid detergents offer more ease-of-use and convenience to consumers compared to powder detergents.

Technavio's analysts forecast the global liquid detergent chemicals market to grow at a CAGR of 4.73% during the period 2016-2020.
