Description

Wiseguyreports.Com Adds “Diesel Engine -Market Demand, Growth, Opportunities and analysis of Top Key Player Forecast to 2021” To Its Research Database

The diesel engine is an internal combustion engine in which air is compressed inside the cylinder to ignite the fuel. Two main types of diesel engines are available in the market. They are two-stroke and four-stroke engines. Diesel engines are capable of offering better operational performance, which makes them a preferred choice over petrol engines. The market is expected to witness high growth due to the rising demand for diesel engines from the automotive industries in APAC. The latest development observed in the market is the incorporation of exhaust after-treatment technologies. This technology aims to reduce emissions, and aid compliance with set standards and regulations.

Technavio's analysts forecast the global diesel engine market to grow at a CAGR of 8.65% during the period 2016-2020.
