

Automotive Expert & Car-Talk Host Bobby Likis Talks with Todd Garner, Chief Executive Officer, Protec Fuel

Installing blender pumps at gas stations to deliver higher blends of ethanol-enhanced fuels

PENSACOLA, FLORIDA, UNITED STATES, September 9, 2016 /EINPresswire.com/ -- Bobby Likis, automotive expert and host of nationally syndicated car-talk program "[Bobby Likis Car Clinic](#)," shares the mic with Todd Garner, Managing Partner and Chief Executive Officer, [Protec Fuel](#), on Saturday, September 10, at 10:41a ET.

The Environmental Protection Agency (EPA) has approved E15 (15% ethanol) fuel for use in all cars and light trucks, model year 2001 and newer. Across the U.S. transportation fleet, this accounts from more than eighty percent (80%) of vehicles on the road today, and that percentage will rapidly increase as consumers buy newer model year vehicles. Additionally, with the manufacture of automotive engines designed to capitalize on the high-octane, high-performance properties of ethanol above E15, the challenge is to build the infrastructure to support increased consumer demand.

The market will look for leadership in bringing blender pumps on-line at gas stations across the nation. Blender pumps are the mechanism that allow the consumer to choose the mixture of gasoline and ethanol/biofuel for maximized performance of their individual vehicle. Since 2006, Protec Fuel specializes in turn-key solutions for building the blender pump infrastructure and beyond--from site selection to marketing after build to long-term pricing to save the station and its consumers money.

Says Garner, "Protec Fuel is a leader in supplying higher ethanol blends and installing blender pumps at retail and fleet sites throughout the U.S. I look forward to talking with Bobby and informing his listeners and viewers about the benefits of higher ethanol blends and how Protec Fuel is expanding

the biofuel infrastructure.”

Likis reflects, “Increased numbers of outlets pumping higher blends of ethanol enable station operators to offer their customers a higher-octane, cleaner-burning fuel at a lower price.” He adds, “I want the drivers in the Car Clinic audience to be fully informed about the advantages of fuel with higher ethanol blends and the necessity of expanding that availability. Todd has the experience and expertise to do just that, and thanks to the Renewable Fuels Association, he’ll be joining me on air to share it with consumers.”

To view Garner's interview in its entirety, visit WatchBobbyLive.com on Saturday, September 10, 10:41a ET.

About Bobby Likis Car Clinic and the Car Clinic Network: Bobby Likis Car Clinic is the largest car-talk program/network on commercial radio, multiple web audiocasts, live video streaming webcast, podcasts (including iTunes), iPhone, chat room, YouTube, Facebook, Twitter, American Forces Radio Network & television. Car Clinic can be heard and seen in high-definition video on Saturdays, 10a-12n ET, live at WatchBobbyLive.com, on Facebook.com/BobbyLikis and on YouTube.com/BobbyLikis. Host Bobby Likis is the only car-talk host on commercial multi-media platforms named for five consecutive years to the “Talkers 250,” the prestigious list of

the top 250 talk-show hosts in America. Likis also owns and operates a 15,000sf automotive service center, whose awards include “Best Automotive Service Shop,” “Best Oil Change,” and most recently, “Best Reputation in Automotive Service.”

About Protec Fuel:

Founded in 1999, Protec Fuel Management, LLC is an ethanol fuel marketing and solutions company dedicated to providing a unique turnkey ethanol solution to distributors, retailers and fleets across the nation. Along with our broad range of risk management products, Protec supplies ethanol to over 200 retailers across the South, Southeast and Mid-Atlantic areas. Protec customers have access to experienced professionals with years of combined technical knowledge. Protec is exclusively positioned to offer services ranging from financial products and technical expertise to ethanol fuel, enabling us to better serve our customers. When you require integrated solutions, we combine our strengths with those of our affiliates to deliver total fuel solutions tailored to your needs.

About Renewable Fuels Association:

Since 1981, the Renewable Fuels Association (RFA) has been the authoritative voice of the U.S. ethanol industry. Our members are committed to helping our country become cleaner, safer, and more energy independent. In creating a forum for ethanol producers and industry stakeholders, RFA has achieved an unequaled record of results through action, advocacy and analysis. With the most experienced staff in the industry, RFA is able to provide timely, comprehensive industry information to our members, Congress, federal and state government agencies, fuel marketers and retailers,

strategic partners, the media and other opinion-leader audiences. RFA has been the industry's most forceful advocate for expanding the market for ethanol. Just as important, we've worked to beat back aggressive challenges to ethanol's progress from special interests seeking to maintain fossil fuel status quo.
