This report helps readers to

- Understand the underlying trends driving changes in the industry
- Gain insight into leading producers in the world
- Use long-term forecasts provided to adjust strategy
- Access extra insight by talking with our research team directly

Global demand for glyphosate has kept increasing rapidly before 2014, along with the promotion of bio-tech crops (mainly Roundup Ready crops) in the world, especially in American countries including the US, Argentina, Brazil and Canada. Stimulated by the huge demand and reasonable profit of the product, many Chinese companies started building production lines of glyphosate and its upstream products such as glycine, iminodiacetonitrile (IDAN), diethanolamine, PMIDA, or phosphorus trichloride, and China has established a relatively mature and complete industrial chain from starting materials to terminal products—glyphosate formulations. Relying on advantages in cost and scale, China grasps more and more market share of glyphosate worldwide. Since 2015, the global demand for glyphosate decreased for the first time attributed to the decreasing planting area of herbicide-tolerant crops resulting from the decreasing price of corn, cotton and rapeseed.

China adopts three production routes of glyphosate technical. The AEA route and the IDAN route show strong competitiveness over the DEA route (the only one used abroad) by virtue of lower production cost and abundant local supply of raw materials as well as profitability supplemented

by utilization of by-products.

So what is the future trend of global supply and demand of glyphosate and its main raw materials? How about the future competition of the three production routes? Will glyphosate production transfer from China and the US to other countries? Is there a possibility that Chinese glyphosate production transfers from the east to the west? And what opportunities will arise from the future development of glyphosate industry? Readers will find the answers in this report.

To Enquiry about report visit @ <https://www.wiseguyreports.com/enquiry/587786-report-on-glyphosate-business-opportunities-worldwide>

This report provides detailed analysis of the following aspects:

- Global and China's supply and demand of glyphosate technical in 2010-2025;
- Introduction and comparison of three production routes of glyphosate technical;
- Projection of glyphosate supply by route in 2016-2025;
- Projection of future possible transfer of glyphosate production worldwide;
- Supply & demand of glycine, IDAN, diethanolamine, ethylene oxide, paraformaldehyde, yellow phosphorus, phosphorus trichloride, dimethyl phosphite, chlor-alkali, and methanol in 2006/2008-2015 and 2016-2025;
- Opportunities for upstream industries derived from global glyphosate development.
- Key players of glyphosate technical such as Zhejiang Wynca Chemical Industry Group Co., Ltd., Fuhua Tongda Agro-chemical Technology Co., Ltd. and Monsanto Company.
