

Turfscapes Westside Leading the Way in Synthetic Turf Landscaping in Los Angeles Area

BEVERLY HILLS, CA, USA, September 13, 2016 /EINPresswire.com/ -- [Turfscapes Westside](#) owners Bradley White and Tommy Gallop had high expectations when they started their Los Angeles area based synthetic turf landscaping business last year. There was a drought impacting the region as well as community water restrictions in place, inspiring homeowners, businesses and communities to re-examine how they approached their lawn care needs. But for the two entrepreneurs, the rapid success of Turfscapes Westside comes down, in part, to its unique customer-first approach.

"We knew the opportunity was there; after all, we live in an area where being eco-conscious and maintaining appearances is everything," said White. "Being the new kid on the synthetic turf landscaping block, we expected there would be challenges, but from the beginning, we've been focused on creating a positive experience through building trust, exceeding expectations and differentiating ourselves by delivering superior customer service, and fortunately that approach has resonated with the Los Angeles community."

One of those residents is [Gina H.](#), a Cheviot Hills resident that was having problems with her existing synthetic turf. She worked with Turfscapes Westside to design a solution that would not only meet her needs, but the needs of her pets and family as well. "We are genuinely impressed with the lengths (Turfscapes Westside) will go to provide superior service backed by conscientious business owners," Gina said. "Turfscapes Westside got me to love my grass again, and I never thought that would happen."

John M., a Hancock Park resident, agrees: "Every person that comes over to the house comments

favorably on what we did, and we tell them they need to call Turfscape Westside if they want to do it, because they're the best," he said.

And Sherman Oaks resident Laurel J. commented, in her [Yelp](#) review, "I did a lot of research on different companies, and I am so happy I went with Turfscape! The turf is very high quality and was installed with great precision. Our son loves playing on his new grass!"

Across the country, more and more people are switching from ordinary grass to Turfscape, and in the Los Angeles area, that switch has involved an emerging leader that is proud to continue earning the community's trust one yard at a time. "We love what we do, we love that we're making a difference and we love that we're doing it the right way, and that's by treating people the way we'd like to be treated," said Gallop.

“

Every person that comes over to the house comments favorably on what we did, and we tell them they need to call Turfscape Westside if they want to do it, because they're the best."

John M., Hancock Park
