Market Scenario:

Women Health refers to state of a complete physical health, mental health, and social well-being, as experienced by women. Some of these relate to structures such as female genitalia and breasts or to conditions caused by hormones specific to females (e.g. menstruation, birth control, maternal health, child birth, menopause, osteoporosis and breast cancer). Women's health issues also include medical situations in which women face problems not directly related to their biology and other socioeconomic factors. Worldwide, women and girls are at greater risk of HIV/AIDS – a phenomenon associated with unsafe sexual activity that is often unconsensual. Market for Women Health Disease Diagnosis & Treatment is booming due to increasing awareness among patients and physicians regarding novel therapies which got introduced in market. The global market for Women Health Disease Diagnosis & Treatment is expected to reach US\$ XX by the end of the forecasted period and is expected to grow at a CAGR of XX%
