

FEIG Gains Membership To The American Public Transportation Association

FEIG Exhibiting the cVEND contactless payment terminals at APTA Transportation Event

ATLANTA, GA, USA, September 14, 2016
/EINPresswire.com/ -- [FEIG ELECTRONICS](#) has gained membership to the American Public Transportation Association (APTA) on the eve of the APTA flagship annual event for public transportation officials in Los Angeles, September 11-14th, 2016.□

With its membership, FEIG brings what it knows about speeding up fare collection for transit operators and delivering the latest payment conveniences to riders with its [cVEND contactless payment terminals](#).

There is a growing challenge for many transit systems in the US that face making upgrades to their contactless collection systems to accept third-party bank cards and NFC payment apps on smart phones. The issue is many existing systems don't support the latest payment and security standards. FEIG's cVEND contactless payment terminals incorporate the EMV Level 2 Kernel (L2K), providing certified EMV-related payment and security functionality on cVEND plug-in modules and standalone card readers.

“

FEIG is eager to share what it knows about next-generation fare collection and how US transit authorities can manage the transition and future-proof their investment in these systems.”

Klaus Schoeke

“FEIG is eager to share what it knows about next-generation fare collection and how US transit authorities can manage the transition and future-proof their investment in these systems,” says Klaus Schoeke, VP of

technical sales and support.

FEIG's cVEND contactless fare systems has been installed in public transportation systems throughout the US and Europe. With its cVEND platform, FEIG supplies a complete product line of contactless readers, sensors, controls and consultation that objectively meets every consideration a transit system requires.

For more information about cVEND download our white paper on [Next Gen Fare Collection](#) or call FEIG at (770) 491-8060 or email FEIG at info@feig-electronics.com.
