

# Global Breast Pump Market 2016 Analysis and Forecast to 2020

*analysts forecast the global breast pump market to grow at a CAGR of 10.16% during the period 2016-2020.*

PUNE, INDIA, September 15, 2016 /EINPresswire.com/ -- [Global Breast Pump Market](#)

Analysts forecast the global breast pump market to grow at a CAGR of 10.16% during the period 2016-2020. Breast pumps are devices used to suction milk from the breasts of lactating mothers and store it in a container to provide a continuous supply of breast milk for feeding their infants as and when required. For instance, when the mothers are not able to feed directly or are away for work, the stored milk can be fed to the infant by the caretakers. Breast pumps assist in triggering the milk ejection response from lactating mothers by creating a seal around the nipple and applying and releasing pressure.
