Market Scenario:

An IUD is a small device that fits inside your womb. It is also known as 'the coil'. It is a T-shaped plastic device that is wrapped in copper or contains hormones. The IUCD works by changing the uterine lining and preventing the fertilized egg from getting attached to the wall of the womb, therefore preventing implantation. There are different types of IUCDs – newer IUCDs contain more copper and are the most effective. They are more than 99% effective.

IUCD market is booming in China due the China's vast network of family planning centers and other government initiatives in local communities that followed the implementation of the One-Child policy. The China IUCD market is expected to reach US\$ XX by the end of the forecasted period and is expected to grow at a CAGR of XX%

## Regional Analysis of Robotic Prosthetics Market:
