Summary

In the global upstream industry, [oil and gas production is expected to increase by 4.5%](#) over the next four years. However capex spending on the planned oil and gas projects is expected to decrease during the analysis period mainly due to persistent low crude oil prices. More than 300 planned production projects are expected to start operations during the 2016 to 2020 period, with South America having the highest planned projects, followed by Europe and Africa. Africa will also have the highest capex spending among all regions in the world during the forecast period.
