

The Core Elements of DCIM is released in Geist white paper

LINCOLN, NE, UNITED STATES, September 15, 2016 /EINPresswire.com/ -- Geist, a leader in data center solutions, is uncovering the foundation of data center infrastructure management in a new white paper, [The Core Elements of DCIM](#).

The management of facilities as complex and dynamic as data centers is not a feat for the faint of heart. High-maintenance equipment must be meticulously arranged to economize space, closely monitored to ensure optimal functionality, and safeguarded from power problems and environmental hazards. Geist offers Environet Facility as a DCIM solution but even more, wants end-users to have the comfort level of DCIM knowledge, along with when and why to implement. The release of this white paper may help answer these questions at hand.

###

About Geist

Geist designs and manufactures intelligent hardware and software for the four cornerstones of data center management: Power. Cool. Monitor. DCIM. Independently, each Geist product line offers industry-leading capabilities and technology. Together, these products combine to create a comprehensive system for maintaining a secure and efficient data center. With a host of scalable systems for single cabinets, entire enterprises and everything in between, each customer benefits from data center infrastructure management (DCIM) solutions custom-fit for their specific needs. Founded in 1948 and headquartered in Lincoln, Nebraska with offices in Asia Pacific and Europe, Geist offers truly global solutions that revolve around customer requirements.
