

Imperial Systems Announces New Name for the Domed Roof of the CMAXX Dust & Fume Collector

JACKSON CENTER, PA, UNITED STATES, September 16, 2016 /EINPresswire.com/ -- Imperial Systems, Inc., one of the leading manufacturers of [Industrial dust collection systems](#) in North America, recently assigned an official name for their [CMAXX](#) domed roof feature. Introducing CrownTECH!

“We gave it a name because it is such a distinctive feature of our CMAXX”, says Jeremiah Wann, President and CEO of Imperial Systems, “We manufacture the only [cartridge collector](#) in the industry that has a domed roof with absolutely no bolt holes.”

This unique feature also allows the CMAXX to hold claim to the industry’s best 4PSI vessel strength rating. The CMAXX with the CrownTECH roof has been tested by a third party and proven to stop a flame front. This assures their customers that the collector they are buying is rated to withstand and control an explosion if one should occur.

“

“We manufacture the only cartridge collector in the industry that has a domed roof with absolutely no bolt holes.”

Jeremiah Wann

Jeremiah goes on to say, “The CrownTECH feature also deflects the nasty elements such as rain, snow, dust and dirt. Independent testing has proven that the CMAXX with all of its features is the strongest-built dust collector in the industry.”

To learn more about Imperial Systems CMAXX, visit their website or call a product specialist at 800-918-3013.

About Imperial Systems, Inc

Located just north of Pittsburgh, Pennsylvania in the small town of Jackson Center, Imperial Systems is among the top dust collection equipment manufacturing businesses in North America. Our values are built on designing and installing custom industrial dust collection systems with the strongest, most durable, fabrication to meet our customer’s needs.

We design innovative but practical and useful dust collection solutions for just about every industry, including, but not limited to: recycling, seed, grain, carpentry, welding, CNC plasma/laser cutting,

thermal spray, grinding, mining, aggregate, sand blasting, aluminum, powder coating, biofuels, food processing, pet food, fiberglass, agricultural, chemical processing, paper scrap, fiberglass and many more.
