According to Researcher, the [Global Biofuel Additives Market](#) is accounted for \$4,424 million in 2015 and is expected to reach \$12,340 million by 2022 growing at a CAGR of 15.8% during the forecast period. Increasing biofuel usage owing to decreasing reliance on the oil producing countries and supportive government regulations are the key factors fueling the market growth. High cost of these additives may impede the market growth during the forecast period. Furthermore, increasing demand for biofuel additives in emerging regions is anticipated to provide growth opportunities for this market.

Detergents and dispersants segment lead the global biofuel additives market in 2015 and is expected to grow at a strong CAGR among the other products. Smoother fuel injection, better combustion and decreased emission are the various advantages obtained by the adding detergents & dispersants. North America accounted for the largest share in biofuel additives market due to higher production and consumption of biofuels. However, Asia Pacific is expected to witness highest growth on account of increasing demand from emerging countries such as China and India.
