[Global Bionic Eye Research Report- Forecast To 2027](#)

Bionic Eye is device which allows blind people to see again. Basically the bionic eye is a computer chip that is placed in the back of the eye. This chip is connected to a small scale camera which sits in a glass that the patient wears. The images caught by the camera are sent by the chip, which are deciphered into driving forces which the brain can translate. This technology is expected to be the most effective to those with macular degeneration.
