According to Researcher, the [Global Rigid Plastic Packaging market](#) is accounted for \$170.9 billion in 2015 and is expected to reach \$260.2 billion by 2022 growing at a CAGR of 6.1% from 2015 to 2022. Factors such as biodegradable rigid plastic packaging, rapid urbanization, increased disposable income and growing demand for beverages and household care products are driving the market growth. Emerging economies and aging population will provide opportunities for the market to emerge. However, the non-biodegradable properties of rigid plastic packaging and fierce competition from Flexible Plastic Packaging are restraining the market. Concerns regarding usage of BisphenolA (BPA) in plastic products are posing a major challenge for the market.

Redesigning in packaging is driving the global beverage container market. Increasing demand for food and beverages products has increased the demand for PET packaging. The rigid plastic containers segment is expected to be the slowest growing segment in the market. Asia Pacific is anticipated to be the fastest growing market. However, in terms of revenue, North America commanded the market followed by Europe. The RoW regional markets are expected to grow at a steady rate.
