

Let the Winds Blow: Haas Door Enhances 5200 & 2000 Series

WAUSEON, OHIO, USA, September 21, 2016 /EINPresswire.com/ -- Neither Mother Nature nor the Big Bad Wolf can "huff and puff and blow the door down" on a home with a 5200 or 2000 Series garage door.

The recently-upgraded steel garage doors from [Haas Door](#) feature enhanced air infiltration seals to provide significant air tightness for the garage doors. The outstanding air infiltration enhancement helps the garage doors stand up to wild winds from Mother Nature.

"These doors are exceptionally durable and energy-efficient," says Jeffrey Nofziger, president of Haas Door. "In our industry there is a standard set forth by the American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc. (ASHRAE).

"Our independent testing shows the new air infiltration seals we've created for garage doors in the 5200 and 2000 Series exceed the ASHRAE 90.1 Standard when installed with a standard bottom seal and a commonly available rigid/flexible vinyl door stop."

Made in the USA, the 5200 and 2000 Series doors have a calculated R-value of 17.66 and a full thermal break in the construction of the 2-inch thick doors. This eliminates metal-to-metal-contact and limits the transfer of temperature.

Filled with dense CFC-free polyurethane foam insulation, the garage doors are manufactured with heavy gauge galvanized steel that incorporate the look

of embossed wood grain. The doors come in 18 color choices with a wide range of sizes and panel options.

This door combines function, beauty and energy savings to make it a winner.

Jeffrey Nofziger, Haas Door

"This door combines function, beauty and energy savings to make it a winner," says Nofziger. "Whether you live in Oklahoma, Florida or Delaware, this door is ready to take on Mother Nature while providing solid energy savings."

Haas Door is located in Wauseon, Ohio, where the company manufactures steel and aluminum residential and commercial garage doors. The family-owned company holds

memberships in IDA and DASMA, and produces products that are sold throughout North America. For more information on Haas Door, visit www.HaasDoor.com.
