

Data Center Cooling Market Segmentation and Forecasts from 2016 to 2021

PUNE, INDIA, September 21, 2016 /EINPresswire.com/ -- Global [Data Center Cooling Market](#) is expected to grow from US\$4.977 billion in 2015 to US\$9 billion by 2021, at a compound annual growth rate of 10.38%. The demand for data storage is increasing and so is the need for more powerful data centers. This has necessitated investments in effective cooling solutions, due to higher consumption of energy by these data centers. If this heat dissipated from data centers is not controlled, it can damage equipment and result in data loss and also higher operation cost for enterprises. These cooling systems ensure temperature levels are within permissible limits as defined by various industry regulations.
