PUNE, INDIA, September 22, 2016 /EINPresswire.com/ -- Global [Radiotherapy](#) Market is accounted for \$6.5 billion in 2015 and is expected to reach \$10.2 billion by 2022 growing at a CAGR of 6.6% during the forecast period. Rising number of cancer patients, technological advancements and increasing aging population are some of the key factors fueling the market growth. However, lack of sufficient infrastructure and healthcare costs are expected to hinder the market.

Technologies such as External beam radiotherapy and internal beam radiotherapy are anticipated to witness highest growth owing to increased pool of cancer patients. North America commanded the largest market share as it is constantly inclined to the newer technologies when compared to slow-moving markets such as Europe. Rising incidence of cancer and unmet healthcare needs in APAC provides ample of opportunities for the players in the market over the foreseeable future.
