According to Researcher, the [Global Healthcare Analytics Market](#) accounted for \$6.8 billion in 2015 and is expected to grow at a CAGR of 24.8% to reach \$32.4 billion by 2022. Growing number of venture capital investments, increasing incidence of aging population and growing occurrence of chronic and infectious diseases are the major drivers favoring the market growth. The factors contributing to the market growth include better efficiency of healthcare organizations, federal healthcare mandates and increasing healthcare IT adoption. However factors such as lack of skilled labor with analytical skills, patient data security and privacy issues are inhibiting the market. Moreover, Cloud-based healthcare analytics offers a major growth opportunity over the forecast period.
