

Risk assessments in fungal spore and bacterial spore excursions

SMi Group reports: the 6th annual Pharmaceutical Microbiology conference will be returning to Holiday Inn Kensington Forum, London on 18 – 19 January 2017

LONDON, UNITED KINGDOM, September 26, 2016 /EINPresswire.com/ -- The event will gather leading [microbiology](#) experts to discuss hot industry topics such as contamination and endotoxins, quality assurance and control, environmental monitoring, new mechanisms of detection and much more.

SMi group is delighted to have Jim Polarine, Senior Technical Service Manager, STERIS Corporation giving an exclusive presentation on day 1 of the conference: Risk assessments in fungal spore and [bacterial](#) spore excursions.

SMi's 6th annual conference... 

**Pharmaceutical
Microbiology**

**18 - 19
JAN
2017**

London, UK

The bacterial culture media segment is likely to continue its increased share until 2023 due to an expected rise in application in food microbiology, pharmaceutical microbiology, and disease research. With the industry updates it is now time to join both regulatory and industry experts to address the complex challenge that the field is facing.

Jim Polarine will discuss risk assessments conducted on fungal spore and bacterial spore contamination in cleanrooms, current examples of excursion investigations, the latest methods in conducting risk based investigations and risk maps and much more.

Furthermore, Alan Baines, Regional Head of Sales, Asia-Pacific from Lonza Bioscience Solutions will be presenting his case study: effective use of data from the bacterial endotoxins test. Alan will focus on topics such as: managing the flow of data, data integrity and how to simplify OOS and OOT investigations using trend analysis.
