

Global 3D Printing Materials Market 2016 Share, Trend, Segmentation and Forecast to 2020

The analysts forecast the global 3D printing materials market to grow at a CAGR of 25.39% during the period 2016-2020.

PUNE, MAHARASHTRA, INDIA, September 27, 2016 /EINPresswire.com/ -- [3D Printing Materials Industry](#)

Description

Wiseguyreports.Com Adds "3D Printing Materials -Market Demand, Growth, Opportunities and analysis of Top Key Player Forecast to 2021" To Its Research Database

3D printing is a technique in which a scanned or digitally designed object is formed into a three-dimensional solid using an additive process. In this process, metal is applied in successive layers with less wastage. 3D printing products can be built from materials in which plastic and metals are the most commonly used materials. A 3D object is designed using computer-aided design (CAD) software or a 3D scanner. The digitalized designed or scanned object is taken by the proprietary software and mathematically sliced into cross sections.

The analysts forecast the global 3D printing materials market to grow at a CAGR of 25.39% during the period 2016-2020.

Covered in this report

The report covers the present scenario and the growth prospects of the global 3D printing materials market for 2016-2020. In order to calculate the market size, we considered the revenue generated through sales of smart glass products for applications such as transportation, infrastructural development, and others (electronics applications and solar energy applications).

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Technavio's report, Global 3D Printing Materials Market 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- Arcam
- EOS
- Hoganas
- Solvay
- Sandvik

Leave a Query @ <https://www.wiseguyreports.com/enquiry/592552-global-3d-printing-materials-market-2016-2020>

Other prominent vendors

- Concept Laser
- ExOne
- Renishaw

Market driver

- Metal 3D printing leads its way in industrial applications
- For a full, detailed list, view our report

Market challenge

- Advanced technological enhancements leading to high production cost
- For a full, detailed list, view our report

Market trend

- Increase in demand for aircraft engines from OEMs
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2020 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?

- What are the strengths and weaknesses of the key vendors?
